OUTDOOR STRING LIGHT

INSTRUCTION & SAFETY SHEET

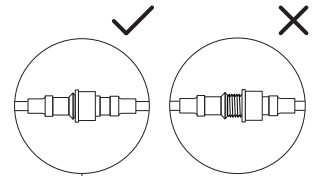

Do not operate unless ALL sockets have bulbs in them. Leaving any sockets empty will result in an electric shock.

In the event of a bulb failing, leave it in the socket until a replacement arrives.

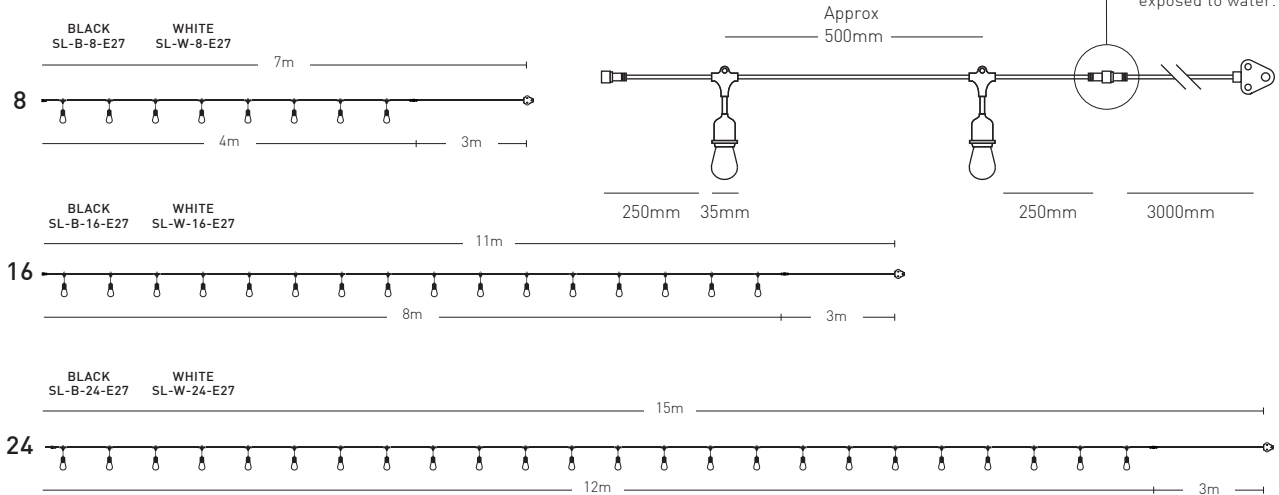

Insert ALL bulbs before connecting the light string to a power source.
Do not leave end "female" connector open. Ensure it is securely closed with the end-cap provided.

Multiple String Lights can be connected in series to a single power source as follows:
2W LED Energy Saving Bulbs : MAX 624 bulbs in series eg. MAX 26 x 24 Socket String Light Sets
11W INCANDESCENT Bulbs : MAX 112 bulbs in series eg. MAX 4 x 24 Socket String Light Sets

Do not submerge in water. Cease use immediately in the unlikely event of a product failure, and notify supplier.

Please ensure this connection is secure so nothing comes apart, breaks or is exposed to water.

RECOMMENDED LIGHT BULBS

PETITE PEAR LIGHT BULBS (SOLD SEPARATELY)

2 W

LED

Max QTY per connected set : 624 x 2W = 1250W

11 W

INCANDESCENT

Max QTY per connected set : 112 x 11W = 1250W
